
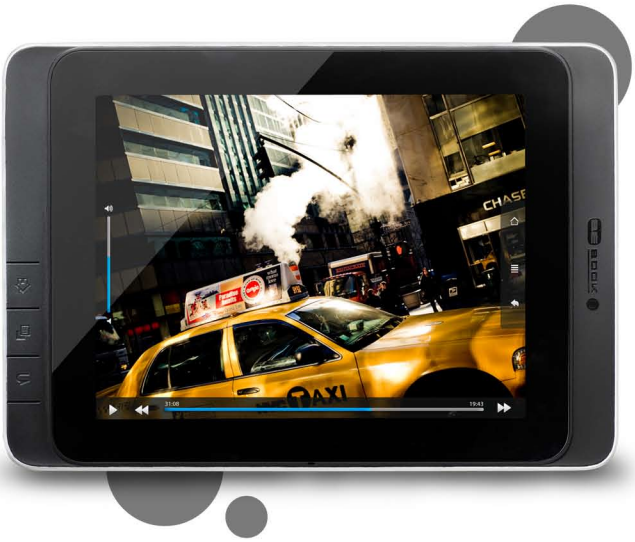
READ.

Read any content you like, from the latest news or novels to eMail, work documents or update your social media presence wherever you like : it's all possible. Just like the BeBook eReaders the BeBook Live Tablet fully supports Adobe DRM (digital rights management) for both ePub and PDF files. Of course any current file and text format is supported as well.

SURF.

Immediate access to virtually every news source or other content on the internet. Unlimited possibilities are just one 'swipe' or click away. Enjoy rich content like interactive magazines. Download the coolest apps or other add-on software. You will have unlimited possibilities to stay in touch with your online friends and even make conference calls using the built in camera and microphone.



WATCH.

The powerful Android operating system and integrated video processor provide the ultimate in graphics display. Use the BeBook Live to store your entire collection of digital pictures or your home movies. Impress your business contacts with a vivid presentation from one single device. Even watching your favourite TV shows or blockbuster movies are easily displayed on your home TV set, using the integrated HDMI connector for HD quality playback.

PLAY.

Use your BeBook Live to play the latest games either on the Live Tablet itself or online. Its motion sensor opens up a new stage in game play. Imagine using your BeBook Live to control the world's fastest cars, favourite game characters or even some Angry Birds, it's all in the palm of your hand.

LIVE

BeBook eReaders are amongst the most familiar faces in electronic reading devices. BeBook decided to go one step beyond and expand our range of eReaders with a tablet PC.

Though different in characteristics we firmly believe eReaders and Tablets both contribute in their own way to access written or other content. We proudly present the BeBook Live.

Available: June 2011
Pre-order: now!
